

# Arctic Blast Reviews - Should You Buy ArcticBlast Pain Relief Support Drops?

Joint and muscle pain is rampant, particularly in the active and aging population. Doctors recommend certain remedies like oral painkillers, soothing creams, and surgery in severe cases.

Studies show that dependence on conventional oral pain relievers is dangerous to your health. Chronic usage leads to addiction. Similarly, overuse of oral pain remedies overworks the kidneys and liver, leading to a malfunction or failure.

Topical creams, balms, and oils are best for soothing pain. Some products comprise natural ingredients that alleviate and battle the pain. Some offer temporary relief, and others support healing.

[ArcticBlast](#) from Nutriomo Labs is a topical product designed to fight pain from arthritis, backache, sprains, strains, and bruises. How does it fight pain? How often should you use ArcticBlast?

## What is ArcticBlast?

Chronic joint and muscle pain can limit your movement and flexibility. It can inhibit you from enjoying your desired activities, including gardening, sport, sewing, and even performing daily tasks.

[ArcticBlast is a pain-relieving formula comprising unique ingredients like DMSO to offer rapid pain relief.](#) It can combat stiff joints and arthritis-related pain. The product is easy to use and ideal for the whole family use.

Kevin Richardson is a US-based pain expert and the formulator of ArcticBlast. He claims he has conducted numerous research to create the formula. Each ingredient in the pain oil is natural, clinically proven, and designed to minimize pain within 60 seconds of application.

ArcticBlast is ideal for anyone looking to fight pain without using oral medication. It gives users zero side effects usually associated with

oral painkillers like Advil, Aleve, and Tylenol. Therefore, customers can comfortably because it is unlikely to manage the liver, kidneys, and other internal organs.

Nutriomo Labs Pte Company manufactures each bottle of ArcticBlast. The manufacturer supposedly follows the acceptable GMP and FDA guidelines.

## How Does ArcticBlast Work?

According to [ArcticBlast's official website](#), the oil comprises DMSO extract popular among athletes and celebrities. The ingredient has undergone rigorous research for decades. Scientists have proven that it may alleviate joint and muscle pain quickly.

ArcticBlast incorporates various other ingredients that alleviate pain in multiple ways. The manufacturer claims the pain-vanishing secret is free from side effects even with prolonged usage. ArcticBlast penetrates the skin rapidly to fight pain. How does it work? Below is a systematic description of how the oil drops can fight discomfort:

Sooth the Muscles and Joints – One minute after application, ArcticBlast supposedly provides a cooling and soothing effect. It has menthol extracts to calm the muscles and dermal cells hence alleviating pain.

Fight Inflammations – ArcticBlast maker recommends massaging the pain location with the oil drops. The rubbing effect ensures each drop penetrates the skin to alleviate inflammations and trigger healing.

Improve Blood Flow – Restricted blood circulation can trigger joint and muscle pain. ArcticBlast can augment blood circulation, providing the dermal, joint, and muscle cells with adequate nutrients and oxygen. Proper blood flow also hampers unhealthy inflammations. Additionally, improved vascularity enhances nerve health, which signals the brain to stop the pain.

In summary, [ArcticBlast offers rapid pain relief by alleviating inflammations, improving blood circulation, and stimulating healing.](#)

The maker recommends applying the soothing oil each time the pain begins. ArcticBlast is free from parabens and ingredients that may damage the skin. It has zero flavors and rapidly dissolves under the skin. Therefore, you can apply it several times a day.

## ArcticBlast Ingredients

Nutriomo Labs reveals that the active ArcticBlast ingredients increase its effectiveness. The different plant extracts have been in use for centuries against pain and improving overall well-being.

## Peppermint Oil

Peppermint oil delivers menthol known to provide instant soothing. Studies show that mint plants cool and soothe the affected area. The nutrient may also accelerate wound healing and epithelization (skin formation.)

ArcticBlast cites that peppermint oil is rich in antioxidants and anti-inflammatories needed to fight chronic pain. Evidence from research stations shows that menthol can benefit animals with arthritis. Topical application of peppermint oil can fight neuropathic pain, carpal syndrome, and arthritis among other joint problems.

Peppermint oil can also improve gastrointestinal health. It can alleviate pain from Irritable Bowel Syndrome, dyspepsia, chest pains, and headaches. Regular application of menthol and peppermint oil can combat and eliminate migraines.

## Aloe Vera

Aloe Vera is among the most studied skin care regimen. It grows in most parts of the world and is used to manage various health problems. Aloe Vera is a cooling agent, anti-inflammatory, and antimicrobial. ArcticBlast claims it can lower joint pain and accelerate wound healing. Additionally, aloe Vera may boost skin health by increasing hydration.

## Camphor oil

Camphor oil is referred to as a pain blocker. It works by improving nerve signals and blocking pain. Studies show that it interferes with the TRP channels, inhibiting the brain from sending pain signals.

Camphor oil is also rich in anti-inflammatory compounds. It can lessen pain by augmenting blood circulation. The nutrient provides a cooling effect, further alleviating joint and muscle pain.

## St John's Wort

St John's Wort is predominant in Greece. Ancient Greek healers recommend it to fight digestive, libido, and joint problems. Native

Australians applied St John's Wort to fight burns, cuts, and depression.

St John's Wort can fight sciatic and neuropathic pain. A 2010 study on humans shows that it can lower pain and improve overall well-being. Oral ingestion of St' Johns Wort may fight inflammatory issues, boost metabolic rates, and raise immunity.

## Arnica Montana Flower Extract / Wolf's Band

Arnica Montana is poisonous and should be administered by experts. Wolf's Band is common in alternative medicine. ArcticBlast claims it can manage infections, inflammations, and arthritis.

Arnica is a potent anti-inflammatory that can fight chronic joint pain associated with arthritis. A study in 2022 reveals that arnica can diminish knee osteoarthritis, joint stiffness, and discomfort.

A scholarly publication in 2007 shows that arnica provides the same pain relief as ibuprofen. However, arnica does not give the users adverse side effects associated with NSAIDs. It may also lower musculoskeletal and back pain.

## Emu Oil

Emu oil is popular in traditional and alternative medicine. The oil originates from emus. Clinical studies verify it has high amounts of fatty acids and antioxidants that can benefit joint health.

Emu oil is an analgesic comprising numerous anti-inflammatory nutrients. It may encourage healthy blood flow. Additionally, it can lower musculoskeletal and joint pain. Some scholars claim it can fight some menopausal symptoms, menstrual cramps, and PMS issues.

## DMSO (Dimethyl Sulfoxide)

DMSO is solvent but may offer various health benefits. The ingredient is popular among athletes and celebs. Dimethyl Sulfoxide is normally used for topical application.

ArcticBlast promotes the ingredient as effective in fighting most types of joint pain. In certain dosages, it can reduce unhealthy inflammations, increase mobility, support blood flow, and eliminate pain.

DMSO can penetrate the skin layers quickly. ArcticBlast does not disclose the amount of solvent in the oil drops. Still, various animal studies indicate that DMSO can benefit arthritis patients. It can enhance flexibility and mobility.

## ArcticBlast Usage Guidelines

Wash your hands before applying ArcticBlast

New ArcticBlast users should conduct a skin patch test

Wash your hands after each application preferably with warm soapy water

If ArcticBlast gets into the eyes. Wash them with clean and flowing water

Consult your doctor if you develop any symptoms after using the pain-relieving balm

The product is not designed for open wounds and cuts because the ingredients may trigger irritation

All users should check the ingredient label to ascertain they are not allergic to any component

ArcticBlast is not ideal for people with skin issues, pregnant, and nursing women

The results of using ArcticBlast depend on your overall health, age, bone mass, and weight, among other factors
