techniques to [boost your dog's intelligence and eliminate bad behavior](#). How does it work? Is the training program effective? How long does it take to experience results?

What is Brain Training for Dogs?

Brain Training for Dogs is an online training course comprising seven modules to enhance your dog's behavior. The creator, Adrienne Farricelli, is a certified dog trainer with over a decade of experience. She reasons that each dog has some innate intelligence, and a good training program should boost brainpower.

Brain Training for Dogs allows dog owners to train their furry friends in the comfort of their homes. The program comes with two digital books, 21 video activities, and several articles by Adrienne Farricelli. The instructor claims the digital course is affordable and may eliminate the need to invest in expensive trainers.

According to the official Brain Training for Dogs website, the course is systematic and straightforward. The system is force-free and advocates for positive reinforcement.

The Science Behind Brain Training for Dogs

According to Dr. J. Coates, Veterinary Advisor, most dogs lack mental stimulation and have little bonding time with their owner. Boredom and anxiety are the root of behavioral disorders. Brain Training for Dogs is a digital program comprising a series of exercises and puzzles to keep your dogs entertained and challenged. Adrienne Farricelli's program is built on the science of neuroplasticity. According to the founder, the brain can mold and change to accommodate new habits and behaviors. The program provides the dogs with adequate mental stimulation to learn further information.

Benefits of the Brain Training for Dogs Program

What is Inside the Brain Training for Dogs Course?

The Brain Training for Dogs course has seven modules to help you change specific behaviors your dog displays. It includes:

Module 1 – Preschool

It is the foundation of the entire course. The module trains the dog to use its innate intelligence to become obedient. Below are the sub-sections of the program:

Users will discover how to maintain eye contact with the dog for better communication

It provides proven methods of keeping the dog attentive using “target training.

The technique teaches the furry friend simple commands such as turning off lights, bringing a leash, ringing bells, and opening doors, among other commands.

It has an airplane game, the ultimate source of reward and pleasure for better behavior.

Module 2 – Elementary School

The second module seeks to help the dog improve its skills and complete the user's command. Some of the games inside the module include:

The muffin game is designed to keep the dog mentally stimulated and out of trouble

The treasure hunt game helps the dog to fight boredom, eliminating behavioral issues

The ball pit game includes fun activities to make the dog easier to work with

Module 3 – High School

The third module contains activities fortifying patience and impulse control in dogs. These include:

The bottle game supports mental stimulation and enough exercises to improve the dog's behavior

Jazz up and Settle Down game contains activities that help the dog to settle down quickly after high-intensity activities.

Bobbing for treats is a water-based activity that helps the dog to overcome water phobia. Additionally, it provides the dog with the excitement and reward of good behavior.

Module 4 – College

The module boosts the dog's motor skills and concentration levels, particularly when receiving commands. The book comprises games such as:

Games that support mental alertness, for example, the shell game

The open sesame game teaches patience and calmness

The magic carpet boosts dexterity and mental acuity

Module 5 – University

The module reinforces the dog's intelligence and patience. The activities inside include:

The hot and cold game boosts the dog's confidence and learning ability

The look that game can do away with unhealthy dog behaviors such as unnecessary barking

The hide-and-seek game strengthens the bond between the owner and the dog

Module 6 – Graduation

The module comprises strategies that fortify the dog's intelligence and motor skills, thus boosting obedience. The activities include:

Advanced Leg-weaving skills that will impress each dog lover

The name recognition game helps the dog pick each toy by name. It can boost cognitive abilities such as memory, creativity, and thinking.

The Serpentine and Spirals game helps the dog to stick by your side and flow your movement without any hassles.

Module 7 – Einstein

The dog enters the “genius level” and can do astonishing tasks such as tidying up his toys, stacking rings, playing piano, and dancing to a rhythm. The activities in this model include:

The ring stackers game boosts patience and concentration

The tidy-up game helps the dog become more organized after playing

Brain Training for Dogs creator claims that completing all the modules makes your furry friend easy to deal with, healthy, and fun.

Bonuses include:
