

Emperor's Vigor Tonic Reviews: Should You Buy? Ingredients, Side Effects Risk, Complaints

Emperor's Vigor Tonic is an erectile dysfunction supplement [available exclusively online](#).

By taking the advanced formula in Emperor's Vigor Tonic daily, men can purportedly support stamina, strength, virility, libido, and overall health using a blend of proven ingredients.

Does Emperor's Vigor Tonic really work? How does Emperor's Vigor Tonic work? Keep reading to find out everything you need to know about Emperor's Vigor Tonic today in our review.

What is Emperor's Vigor Tonic?

Emperor's Vigor Tonic is a nutritional supplement marketed primarily to men with erectile dysfunction.

Each capsule of Emperor's Vigor Tonic contains a blend of ingredients designed to support sexual function in different ways. Some ingredients boost blood flow, while others target

libido and sex drive. By taking Emperor's Vigor Tonic daily, you get a blend of carefully selected ingredients to improve sexual function.

Many of the ingredients in Emperor's Vigor Tonic were used by Chinese emperors and other rulers throughout history. They have a long history of use in traditional Chinese medicine. Despite being little-known in the western world, many of these ingredients are backed by modern scientific evidence – including double-blind, placebo-controlled clinical trials.

Emperor's Vigor Tonic is exclusively available online through EmperorsVigorTonic.com, where it's priced at \$69 per bottle. According to the official website, Emperor's Vigor Tonic has an average rating of 4.75 stars out of 5 based on 18,300+ reviews to date.

Emperor's Vigor Tonic Benefits

Emperor's Vigor Tonic is marketed primarily to men with erectile dysfunction and other types of sexual performance issues. Whether you're struggling to get hard or you've noticed lower libido in recent years, you could experience a range of benefits with Emperor's Vigor Tonic, including:

- Support overall male health
- Support stamina and strength
- Support virility, libido, and overall sex drive
- Boost vitality
- Blend of 100% natural ingredients backed by science
- Made in the United States in FDA-registered, GMP-certified facility

The image is a promotional banner for Emperor's Vigor Tonic. On the left, there is a product shot of a white bottle with a black label. The label features the brand name 'Emperor's Vigor Tonic' in gold and black text, along with 'CLINICALLY RESEARCHED NATURAL MALE FORMULA' and a list of benefits: '• Men's Health Support', '• Stamina & Strength', and '• Libido Boost!'. The bottle is surrounded by fresh green herbs and red berries. To the right of the bottle, the text reads 'The Natural Formula That Supports Men's Virility And Libido'. Below this, a paragraph states: 'This innovative formula is designed with your well-being in mind. Emperor's Vigor Tonic aims to support male health by using a blend of carefully selected ingredients.' At the bottom of the banner, there are five circular icons: 'GOOD MANUFACTURING PRACTICE GMP CERTIFIED', 'MADE IN A FDA REGISTERED FACILITY', '100% NATURAL INGREDIENTS', 'MADE IN USA', and 'GMO FREE'.

How Does Emperor's Vigor Tonic Work?

Emperor's Vigor Tonic works by addressing a specific enzyme within your body linked to sexual performance.

Enzymes in your body perform a variety of tasks – from breaking down the food you eat to supporting reproduction. By targeting a specific enzyme using natural ingredients, Emperor's

Vigor Tonic can make it easier to get hard, target erectile dysfunction, and support overall male health and vitality.

You can find over-the-counter medication and prescription drugs for erectile dysfunction. Unlike these methods, however, Emperor's Vigor Tonic claims to have no side effects. In fact, the manufacturer claims to have “more than 88,730 customers” to date with no reports of notable side effects. While ED drugs could affect other areas of your health, Emperor's Vigor Tonic is designed to work without side effects.

The secret to Emperor's Vigor Tonic's success is the 500mg proprietary blend inside each capsule. That proprietary blend contains 11 ingredients linked to male health and vitality – from wild yam extract to Chinese herbs and plants.

Emperor's Vigor Tonic Ingredients

Emperor's Vigor Tonic contains a blend of 11 handpicked ingredients linked to sexual health, sexual performance in men, blood flow, libido, and more.

Many of the ingredients in Emperor's Vigor Tonic trace their roots to traditional Chinese medicine. Some have been used for centuries – or even millennia – to support male vitality and overall wellness. Some are backed by modern science, while others are accompanied with anecdotal evidence from men insisting they work as advertised.

Dodder Seed

Wild Yam

Rehmanniae Radix

Cnidium Monnieri

Eucommia Ulmoides

Cistanche

Radix Achyranthis

Schisandra

Poria Cocos

Here are all of the active ingredients in Emperor's Vigor Tonic and how they could work to support sexual function:

Dodder Seed: Dodder seed is an herb popular in traditional Chinese medicine. Also known as *Semen cuscutae*, dodder seed is a thin, vine-like stem with yellow or white flowers. There's limited information in the western medical community about how dodder seed works or what it does. However, [some studies](#) have found dodder contains chemicals with antioxidant effects. These antioxidants could support healthy inflammation, support the health of your internal organs, and help with blood flow – all of which could promote sexual function and help with ED.

[Emperor's Vigor Tonic Is On Sale Now For A Limited Time!](#)

Wild Yam: Wild yam was traditionally used to treat menstrual cramps and PMS symptoms, and it rose to popularity throughout the 1700s and 1800s for that purpose. Today, studies suggest wild yam could balance hormones in men and women, promoting a healthy balance of estrogen, progesterone, and other hormones. According to [Mount Sinai](#), many supplement companies advertise wild yam as being a natural source of plant-based estrogen. Although there's little evidence supporting that claim, some studies have found wild yam can support relief from certain menopause symptoms – including hot flashes.

Rehmannia Radix: *Rehmannia radix*, also known as *Radix rehmannia*, is a genus of seven species of flowering plants native to China. The extract from these plants is traditionally used to make medicine. Some studies have backed these medicinal properties. One [2017 study](#), for example, reviewed 30 trials on the plant and found it could help with various inflammatory and metabolic diseases, for example – including blood pressure and diabetes. Also known as sheng di huang, the root extract has a long history of use in traditional Chinese and Japanese medicine practices, although it's little-known in the western world or supplement community.

Cnidium Monnieri: *Cnidium monnieri*, also known simply as *Cnidium*, is another plant native to China but commonly found throughout Asia. Traditional medicine practitioners in Asia have used the fruits, seeds, and other parts of the plant to make medicine. In fact, [studies show](#) *Cnidium* is “one of the most widely used traditional herbal medicines” in traditional Chinese medicine. [One large review](#) found *Cnidium* had multiple pharmacological properties that could make it beneficial for various conditions. That review specifically found *Cnidium* could help with male impotence, for example, which is one reason it's found in an ED supplement like Emperor's Vigor Tonic. Researchers traced these effects to 350 natural compounds within the plant – including the main active chemicals, which are called coumarins.

Eucommia Ulmoides: *Eucommia ulmoides* is a small tree that, like most other ingredients in Emperor's Vigor Tonic, is native to China. Little-known outside of traditional Chinese medicine, the tree is also known as hardy rubber tree. It's most frequently grown as an ornamental shade tree, although some use extract from the tree as medicine. One recent review found *Eucommia ulmoides* had “health-promoting properties,” for example, because it contains phenolics, steroids, flavonoids, and other compounds linked to health and wellness. The tree is also known as Du Zhong in China, and traditional Chinese medicine practitioners use it for a range of ailments and illnesses.

Cistanche: Cistanche, also known as Cistanche deserticola, is yet another plant popular in traditional Chinese medicine but little-known outside of the traditional Chinese medicine community. Like other ingredients in Emperor's Vigor Tonic, it's traditionally used to treat sexual dysfunction, hormone balance issues, and low libido. One of the few major studies on cistanche was [published in 2023](#). Researchers assessed the neuroprotective, hepatoprotective, and other pharmacological effects of the plant extract, concluding it had multiple bioactive compounds linked to health and wellness. In fact, researchers found cistanche "has great potential for development in functional food applications." The plant is also known as desert ginseng.

[Act quickly – order now by clicking here!](#)

Radix Achyranthis: Radix achyranthis bidentatae, also shortened to radix, has a long history of use as a neuroprotective agent and brain health supplement. It's particularly popular in traditional Chinese medicine. [Recent studies](#) on rats suggest radix inhibits the production of advanced glycation end products, reducing their accumulation in brain tissue, which is one reason it may provide protective effects. Radix also appears to have antioxidant effects, which could help with inflammation throughout the brain and body. Other studies have connected radix to improved memory and cognitive performance in humans. It's tough to find in the western world, but radix is often advertised by traditional Chinese medicine practitioners as a way to tonify your qi and blood. Also known as huai niu xi, the plant can also be found on Amazon in dried and extracted form.

Schisandra: Schisandra is a berry rich with vitamin C. Like other ingredients in Emperor's Vigor Tonic, it traces its roots to traditional Chinese medicine. However, schisandra is one of the best-known traditional Chinese medicine ingredients in the western world, and many supplements contain schisandra berry for various benefits. Some supplements use schisandra for inflammation or weight loss. Others use it for blood flow and libido. Traditional Chinese medicine practitioners may recommend schisandra for erectile dysfunction. A [2018 study](#) found schisandra could boost nitric oxide, enhancing blood flow and making it easier to contract the penile corpus cavernosum smooth muscle. Also known as omija or schisandra chinensis, schisandra berry has also [been shown](#) to improve sperm vitality in cows.

Poria Cocos: Poria cocos is a type of mushroom popular in traditional Chinese medicine. Technically, like chaga, poria cocos is not a mushroom – it's a type of hardened fungal mass. However, it's frequently referred to as a mushroom, and you can find poria mushroom powder sold online today as a nootropic. Also known as fu long or poria sclerotium, poria cocos is used as an antitumor drug in China. Traditional Chinese medicine practitioners have recommended it as an anticancer ingredient for centuries. Today, [some evidence](#) has suggested poria cocos has anticancer and antitumor properties because of its natural antioxidant and anti-inflammatory effects, which could make it easier for your immune system to do its job.

Shan Zhu Yu: Shan zhu yu, also known as fructus corni, is the ripe pulp of Cornus officinalis, a plant native to parts of China. Traditional Chinese medicine practitioners may recommend shan zhu yu for incontinence, excessive sweating, and certain reproductive health issues. Although there's little evidence proving shan zhu yu can help with erectile dysfunction or libido, [one 2020 study](#) found it could help with depression, and many people

use the plant extract daily for a variety of health purposes. It's also backed by 2,000 years of use in Chinese herbal medicine, and some claim it can reduce heavy toxicity.

Polygala Tenuifolia: The final active ingredient in Emperor's Vigor Tonic is Polygala tenuifolia, which is best-known for its nootropic effects. The root has a long history of use in traditional Chinese medicine, where practitioners recommend it as a way to boost memory and protective against cognitive decline. Today, polygala tenuifolia has been studied for its effects against Alzheimer's, with [one 2020 study](#) describing it as "a source for anti-Alzheimer's disease drugs."

Overall, Emperor's Vigor Tonic contains a blend of unique ingredients not frequently seen in other [male sexual health supplements](#). While other male sexual health supplements contain similar ingredients – like fenugreek and tribulus terrestris – Emperor's Vigor Tonic takes a different approach.

What to Expect with Emperor's Vigor Tonic

Emperor's Vigor Tonic has one of the most unique lists of ingredients in the sexual health supplement industry. Few of the ingredients are widely available for purchase online, and most of the ingredients are little-known outside of traditional Chinese herbal medicine.

What can you expect after taking Emperor's Vigor Tonic? What does the supplement do? How does Emperor's Vigor Tonic help with ED, sexual function, and libido?

Here are some of the effects you could experience after taking Emperor's Vigor Tonic, based on the list of ingredients available online:

Support Blood Flow for Easier Erections: Some of the ingredients in Emperor's Vigor Tonic support nitric oxide (NO) production. Your body produces NO to make blood vessels flexible, helping blood to flow throughout your body. If poor blood flow is making it difficult to get an erection, then some of the ingredients in Emperor's Vigor Tonic could help.

Support Healthy Inflammation for Better Sexual Performance: High levels of inflammation make it difficult to perform in bed. Inflammation can worsen blood flow, weaken erections, and increase your risk of certain diseases and illnesses. Some of the ingredients in Emperor's Vigor Tonic are rich with natural antioxidants – like vitamin C and others – known to support healthy inflammation for better sexual performance.

Manage Stress & Mood for Enhanced Performance: Some of the ingredients in Emperor's Vigor Tonic manage stress and mood for enhanced performance. These ingredients can support your body's response to stress via adaptogenic effects, for example. Your body encounters physical and mental stressors every day, and those stressors can worsen sexual performance.

Support Balanced Hormones like Estrogen & Testosterone: If your estrogen levels are too high, it could make it difficult to get an erection, and you might experience lower libido. If your testosterone levels are low, you could experience similar symptoms. Emperor's Vigor

Tonic works by balancing estrogen and testosterone, and some of the ingredients could promote hormone balance.

Boost Libido for Greater Sex Drive: Some of the ingredients in Emperor's Vigor Tonic – particularly the herbs and roots – work in little-known ways to boost libido and sex drive. Some herbs have been shown to enhance sexual desire, for example, and boost virility. While other supplements use horny goat weed and similar ingredients, Emperor's Vigor Tonic takes a different approach with a collection of ingredients backed by centuries of use in traditional Chinese medicine.

Overall, erectile disunion is a complicated issue, and men experience ED for different reasons. Emperor's Vigor Tonic works by targeting ED and sexual dysfunction in multiple ways, which could help regardless of the reason for your issue.
