

# LOCERIN - LOCERIN REVIEW – PROTECTS YOUR HAIR FROM FALLING OUT

Taking care of your appearance should always be comprehensive and include not only the fight against being overweight, slim and slender. Equally important is the condition of our skin and hair, an important attribute of female beauty, which really must not be underestimated.

Dull, brittle and fragile hair not only immediately attract negative stares, it can also start to fall out, and no woman would want to experience that.

Unfortunately, such situations sometimes occur, and it is necessary to counteract this with strict consistency using effective measures, among which **Locerin** stands out particularly favorably.

## YOU ARE LOSING YOUR HAIR – FIRST OF ALL, DO NOT PANIC

*the woman with long hair*

As soon as you notice a large amount of hair in the bathtub after washing, or in the sink when you brush it, your first reaction is usually panic, and that's the worst thing you can do in this situation.

As the saying goes, only calmness can save us and the problem should be approached in exactly this way. The first step should be to identify why the hair began to fall out, which does not necessarily require a visit to a specialist, trichologist or dermatologist.

In fact, we can diagnose most of the causes ourselves, and the most common are:

- stress, which is sometimes hard for us to avoid, even though it automatically reflects on the state of our hair;
- improper hair care, ill-suited cosmetics, overdoing it with straighteners and hair dryers or even tying it up tightly;
- diseases, which we often do not know about, ailments that affect many of us, hormonal disorders, thyroid problems;
- medications we are currently taking, and thinning hair is caused by many of them;
- hereditary tendencies, especially when someone in the family complains about androgenic alopecia, having strictly genetic basis.

Of course, these are only some of the causes, but already on this basis we can eliminate some, change the way of proceeding, and eliminate the losses we have already caused by using just Locerin, a dietary supplement in the form of capsules.

## LOCERIN – NATURAL, SAFE INGREDIENT

### *Locerin*

In each such small capsule there is a veritable treasure trove of everything our hair needs to regain full health, lost shine and vitality.

We can be sure not only of their effectiveness, but also of their safety, when following the recommended dosage do not cause any side effects. **Locerin** we find, among other things:

- an innovative, I can even say revolutionary AnaGain™ Nu complex, the result of the latest research in this field, acting on the level of our DNA, effectively stimulating the growth of new, healthier and stronger hair;
- Selenium SeLECT®, a blend of carefully selected minerals and a set of the best vitamins for hair, including the much needed biotin and zinc. In addition, Locerin contains large amounts of copper, which helps hair retain its deep, natural colour;
- nettle, a herb commonly used in cosmetics and medical preparations, which strengthens hair along its entire length. A similar function is fulfilled by alfalfa, and the action of both will also benefit the skin and nails;
- common bamboo, containing large amounts of silicon, a material responsible for the proper structure of hair;

- black pepper extract, piperine, here in the form of patented BioPerine®, ensuring better absorption by the body of nutrients supplied to it, selenium, iron, B vitamins and beta-carotene.

## LOCERIN – DOSAGE AND EFFECTS

You really can't have any objections to the composition, and as I already mentioned, Locerin is available in the form of capsules, taken according to the manufacturer's recommendations twice a day, half an hour before meals and washed down with plenty of water.

This is what I did every day and after just one month my amazement had no bounds. Not only did I manage to stop hair loss almost completely in that record time, but new hair started growing just as quickly, much thicker and with a stronger, clearer shade.

In addition, the condition of my skin has improved and not only on my head, I have the impression that it is healthier, better supplied with blood and oxygen, and my hair needs nothing else.

Surprised and obviously pleased, I immediately recommended **Locerin** friends, complaining about the same problems as mine.

Their initial concerns were completely dispelled by the new, captivating look of my hair, and further reading of the information on this supplement revealed that it is effective in over 85 percent of cases.

I don't think a better recommendation is needed, and its effectiveness is also confirmed by the positive feedback it has received not only from those who use it, but also from specialists, including my trichologist friend.

## LOCERIN – AVAILABLE DIRECTLY FROM THE MANUFACTURER

You can buy it directly from the manufacturer by placing an order through his website, **website** which in my opinion is the best form of distribution. Thanks to this, we will always have one hundred percent certainty that we get the original and fully effective **Locerin** and not just a placebo.

There is no need to risk buying a supplement from unproven sources, and the manufacturer also provides its lowest prices and a whole lot of attractive promotions
