## PENIS ENLARGEMENT AND THICKENING – METHODS USED

*frustration 01 300x215 1*

There are many ways to solve this embarrassing male problem, which can be found in one of the numerous articles posted on the net.

However, most of them usually boil down to plastic surgery, carrying a serious risk of complications, which in extreme cases may even lead to impotence.

Let's face it, this is a complicated operation, involving cutting the ligament connecting the penis with the pubic bone, which is worth avoiding.

Another frequently used, but also invasive method, are injections of hyaluronic acid, or the use of so-called extenders, i.e. mechanical devices stretching the penis, which have to be worn for several hours a day, which is neither comfortable nor certainly safe.

So if we want to avoid such torments, we are left with the use of modern dietary supplements, such as **Member XXL**.

## **MEMBER XXL – COMPOSITION OPTIMIZED FOR MAXIMUM EFFECTIVENESS**

This is a new generation supplement developed precisely for this male affliction, with a 100% natural, completely safe composition, without the risk of any adverse effects. **Member XXL** is valued for its effectiveness and speed of action, guaranteed by carefully selected ingredients such as:

strong exhaustion, quickly restoring damaged strength and improving psychophysical condition. It also increases endurance and has long been valued as an aphrodisiac which increases sexual performance and desire, especially in men

- extract from ginseng root, its Korean variety, increasing among others oxygenation of all organs, including the penis. It contains many vitamins, easily assimilable sugars and minerals necessary for maintaining health and full sexual performance. Thanks to its ginsenosides content, in turn, it supports the relaxation of blood vessels in the penis, significantly increasing its length and thickness
- saffron extract, another aphrodisiac known for centuries, effectively stimulating male libido
- l – arginine, also increasing blood flow, which lengthens the penis during erection

The recommended dose of the supplement is just two capsules a day, taken preferably in the morning, at least 30 minutes before a meal.

The ingredients start working almost immediately, and the full, measurable effects will be noticed after about 3 weeks from the start and continuation of regular treatment.

**Member XXL** causes more blood to flow to the penis during sexual arousal, which enlarges its tissues, which also begin to grow at a high rate, and tests have shown that in some patients this is even 2cm in a month. The full results are obtained after further 3 months and the maximum penile length increase we can count on is 8-9 cm with a proportional increase of its diameter.

It is thanks to this confirmed action that **Member XXL** enjoys such good opinions which can be found on many discussion forums devoted to this male problem.

More than 70 percent of men who use it praise its safe composition, lack of side effects and willingly recommend it to their friends, emphasizing the extremely fast achievement of desired results, including increased desire for sex, and one of such opinions I allow myself to quote:

*“Sex plays an important role in my life, but a small penis made it much more difficult for me. I didn’t want to have surgery so I decided to increase the size with Member XXL and it worked. Now I know that I am alive and my penis is already 5 cm bigger”. – Arek.*
