

# NUVIALAB FEMALE FERTILITY - NUVIALAB FEMALE FERTILITY REVIEW – SUPPORTS FEMALE FERTILITY AND LIBIDO WITH THE POWER OF NATURAL INGREDIENTS

The dream of many women is to start a family and have children. Unfortunately, for various reasons, it cannot always come true, and problems with female fertility are due, among other things, to weakened health. This includes both its physical aspects and mental health, and these can be strengthened by taking a dietary supplement **NuviaLab Female Fertility** . Its natural ingredients were carefully selected to improve fertility, support sexual activity and make it easier to get pregnant.

*NuviaLab Female Fertility PRO4*

## WHAT CAN LEAD TO WEAKENED FEMALE FERTILITY AND LIBIDO?

*A woman takes a pregnancy test*

Fertility disorders and weakened libido are as common in women as in men. This problem in our country alone affects nearly 1.5 million women of all ages every year, and it is for them that NuviaLab Female Fertility capsules are designed. Difficulties in getting pregnant can have varied causes, and specialists dealing with this type of ailment point primarily to:

- hormonal imbalances in the body causing a decrease in female sex hormones, a common cause of which is overweight and obesity;
- polycystic ovary syndrome, abbreviated as PCOS, manifested by an excess of male sex hormones in the blood, interference with ovulation and menstruation, leading to infertility;
- endometriosis, a painful and difficult-to-diagnose disease in which cells of the endometrium, or endometrium, are deposited outside the uterus;
- developing myomas or polyps in the uterus, just as dangerous as cervical disease, cancer or ovarian failure;
- diseases of the thyroid gland, disrupting the hormonal balance, especially its hypothyroidism;
- diseases that attack the adrenal glands, kidneys and liver, and one of their symptoms may be precisely a decrease in fertility;
- an excess of stimulants, and alcohol is particularly harmful; drugs and compulsive smoking pose a similar threat to female fertility;

- a diet poor in nutrients essential for health, instead full of white sugar, salt, trans fat, fast food and highly processed foods;
- an inappropriate way of losing weight, consisting not of an easy-to-digest diet and physical activity, but of starvation;
- taking certain groups of drugs, overdosing on painkillers;
- poorly selected training program, too intensive physical exercise, for example, at the gym.

## **NUVIALAB FEMALE FERTILITY – WHAT IS THIS SUPPLEMENT AND WHAT EFFECT CAN YOU COUNT ON?**

*NuviaLab Female Fertility*

**NuviaLab Female Fertility** is a modern dietary supplement developed specifically for women struggling to get pregnant. It is steadily growing in popularity, with satisfied women and experts giving it overwhelmingly positive reviews. In them, they emphasize all the advantages of using these capsules:

- supporting the maintenance of full fertility;
- maintaining normal reproductive functions;

- strengthening the weakened libido allowing to lead an active sex life;
- participation in the process of growth and division of reproductive cells;
- better coping with the negative effects of stress;
- increasing vitality and more energy for action;
- improving the quality of sleep, preventing insomnia;
- faster recovery after physical and mental exertion;
- simple use, dosage of only 2 capsules per day, one in the morning and the other in the evening;
- quick and lasting effects, noticeable after just a few weeks, which, however, is an individual matter for each body.

## **NUVIALAB FEMALE FERTILITY – THE COMPOSITION RESPONSIBLE FOR THE EFFECTIVENESS OF THE SUPPLEMENT.**

Getting such effects of NuviaLab Female Fertility capsules is due to their composition. In it you will not find any artificial, harmful substances that cause side effects, but only natural and safe to use, together forming a unique formula. The manufacturer recommends checking in advance whether any of the ingredients will cause an individual allergic reaction, for which it is not responsible. These fortunately occur very rarely, and each capsule contains:

### **EXTRACT FROM THE HERB OF BLADDERWRACK**

An alga from the large brown seaweed family, valued for its composition and numerous medicinal properties. Nutrients in hake include vitamin B12, vitamin C, vitamin E, zinc, phosphorus, manganese, copper, molybdenum, potassium, sodium, iron, carotenoids, catechins, polyphenols, proteins, amino acids, fiber. Together with a high dose of iodine, they have an effect on:

- strengthening and preserving fertility;
- proper functioning of the thyroid gland;
- proper development of the unborn child.

### **ROSEHIP EXTRACT**

Another active ingredient in NuviaLab Female Fertility is rosehip fruit extract full of vitamin C, a powerful antioxidant. The fruit also contains vitamins A, B, E and K, as well as minerals, organic acids, flavonoids, pectin and tannins. Thanks to them they gain properties:

- antioxidant, reducing free radicals;
- anti-inflammatory;
- increasing the body's immunity;
- removing the effects of stress and fatigue.

### **MACA ROOT EXTRACT – MACARADE™.**

A unique and patented formula, an extract from the root of a plant that is an adaptogen, with the strongest anti-stress effects. Maca root is also used for other purposes, promoting female health resulting from the presence of 0.5% macamidesw, vitamins B1, B2, C, E and unsaturated fatty acids, zinc, potassium, calcium, iron and plant sterols, determining the effect:

- strengthening weakened libido;
- antioxidant, protecting cells from oxidative stress;
- increasing vitality and fertility;
- protecting bones from osteoporosis.

### **MYO-INOSITOL**

A natural chemical compound synthesized in the human body, sometimes called vitamin B8, any deficiencies of which will be replenished together with NuviaLab Female Fertility capsules. Its effects on health can safely be considered comprehensive:

- increases the chance of getting pregnant by improving metabolic and endocrine parameters;
- regulates the levels of the gonadotropic hormones LH and FSH responsible for the proper functioning of the ovaries and the secretion of estrogen and progesterone;

- increases tissue sensitivity to insulin;
- improves sugar metabolism, preventing increases in blood glucose levels;
- supports the treatment of polycystic ovary syndrome.

### **COENZYME Q10**

Another compound produced in the body, found, among other things, in cellular mitochondria, which was also included in the composition of this dietary supplement due to its numerous properties. Its research-confirmed effects boil down to:

- producing large doses of energy;
- stopping aging processes thanks to its antioxidant properties;
- inhibiting the loss of ovarian follicles coming with age;
- speeding up metabolism and boosting immunity.

### **B VITAMINS**

If NuviaLab Female Fertility capsules are to effectively support female libido and fertility, they must have selected B vitamins in the formulation, and the manufacturer chose to use:

- vitamin B1, thiamine, which regulates the nervous and cardiovascular systems, accelerates the regeneration of the body and removes the feeling of fatigue;
- vitamin B2, riboflavin, which participates in fat metabolism, improves endocrine metabolism, protects cells from oxidative stress;
- vitamin B3, niacin, which increases muscle performance, optimizes hormone secretion, normalizes blood pressure and reduces cholesterol LDL;
- vitamin B4, choline, involved in homocysteine metabolism, supporting liver function, and conditioning normal fetal development;
- vitamin B6, pyridoxine, which reduces muscle cramps, intensifies fat burning and synthesis of proteins, hormones and nucleic acids;

- vitamin B7, biotin, which improves the absorption of vitamin C, reduces the possibility of fetal malformations, and takes care of the condition of hair, skin and nails;
- vitamin B9, folic acid, here in a unique formula Advifolate®, responsible for the development of the nervous system in the child, the absence of fetal malformations, taking part in the process of cell division, alleviating the effects of stress.

### **VITAMIN D**

Another vitamin in the composition of this dietary supplement for women has broad health-promoting effects boiling down to:

- supporting the maintenance of normal fertility;
- regulation of menstrual cycle processes;
- inhibition and delay of ovarian aging;
- strengthening bones and their protection against osteoporosis;
- acceleration of the body's recovery after exercise.

### **VITAMIN E**

Commonly referred to as the “*vitamin of youth*,” it is all too effective in stopping the aging process, but this is not its only noteworthy action, vitamin E also has a beneficial effect on:

- protecting the body from the effects of free radicals;
- improving impaired fertility and enhancing libido;
- counteracting cardiovascular disorders.

### **MINERAL COMPLEX**

Without which the action of NuviaLab Female Fertility capsules would not be as effective, so the following minerals were included:

- zinc, an element even essential for health, facilitating the absorption of other nutrients, improving metabolism;

- selenium, also in a patented and unique form of Selenium SeLECT® 5000, minimizing the risk of miscarriage, responsible for normal birth weight of the baby and proper functioning of the thyroid gland;
- iron, counteracting anemia, reducing the feeling of fatigue, taking part in the production of red blood cells, strengthening immunity and the course of metabolic processes.
