

Neuro-Balance Therapy Reviews (2024 WARNING!) - Is It Legit Neurological Physical Therapy & Spiky Ball? Hidden Facts!

Hello my name is Clark, I brought some important information involving the Neuro Balance Therapy. If it is really good, if it is worth buying it, I hope you like it. :)

Are you tired of living in fear of falling? Do you want to regain your balance and confidence? [Look no further than Neuro Balance Therapy!](#) This revolutionary therapy has been changing lives with its

10-second exercise that targets dormant nerves in the feet. It strengthens physical stability and helps prevent falls.

Moreover, it's not just for the elderly; adults in their 30s and 40s can benefit too. This review will dive deep into the science behind Neuro Balance Therapy. Furthermore, we will explore its effectiveness in preventing falls and regaining stamina. Get ready to say goodbye to tripping and hello to a new sense of balance and freedom!

What is Neuro-Balance Therapy?

Neuro Balance Therapy is a revolutionary program designed to address nutrition and improve balance, strength, and body stability. It acts as a vestibular rehabilitation to prevent tripping and falling that gradually occur with age. It consists of a few minutes of balance exercises you can do daily. The goal is to reactivate and rejuvenate the peroneal nerve in your feet. This nerve helps you gain control of the lower body muscles, says Dr. Chris Wilson, after specific tests.

Moreover, the therapy effectively revives your dormant nerves and restores your stamina, strength, and agility so that you will no longer fall. Dr. Wilson struggled to create this program after watching his family struggle with mobility issues. Therefore, his

motive led to the creation of this therapy to help people overcome the challenges of muscle weakness.

The program includes a series of gentle and easy exercises that you can do at home. You do not need any advanced equipment. You only need a firm chair and a nerve-stimulating spike ball that comes with the package when you purchase it. Chris Wilson has divided the exercises into three types: newbies, intermediate, and experts so that everyone can progress at their own pace.

For best results, it's crucial to execute these exercises frequently. The program is beneficial not only for individuals with mobility issues but also for anyone who wants to improve their overall body stability and prevent falls. By reactivating the peroneal nerve, the program helps restore the natural ability of the body to become steady at every step.

How Does Neuro-Balance Therapy Work?

Neuro-Balance Therapy is a program that aims to improve balance and stability by targeting the peroneal nerve. The peroneal nerve runs down the outside of the lower leg and controls the muscles that help maintain your balance system and stability in the ankle

and foot. If this nerve is damaged or weak, it can lead to balance problems and falls. Here is how the program works:

This therapy focuses on reviving the peroneal nerve, responsible for balance and stability in the lower leg and foot.

The program involves a series of exercises and movements that aim to improve the revival speed of the peroneal nerve.

The program also includes a Spike Ball, used to massage and stimulate the nerves in the foot and ankle.

The exercises and movements are designed to challenge the balance and stability of the user. These exercises help to strengthen the peroneal nerve over time.

The program includes a set of progressions that gradually increase in difficulty. These levels allow users to improve their balance and stability over time.

It also includes education on fall prevention, including tips for making the home safer and reducing the risk of falls.

The program is easy to follow in the comfort of the user's home. Furthermore, there is no need for expensive equipment or a gym membership.

Users can also monitor their development and see advancements in their stability and balancing system. Furthermore, it addresses nutrition as well.

Features of the Program

Here are some of the program's primary features to help individuals improve their balance and stability:

Follow-Along Videos

The program includes a set of follow-along videos that demonstrate various exercises and movements. It helps strengthen the peroneal nerve and improve balance. It has focused treatment plans.

Spike Ball

The program comes with a unique Spike Ball. The dead peroneal nerve in your foot can be roused by using this ball, which also helps you regain your balance. Crystallized particles and a calming but hardening substance are present in the Spike Ball.

Easy to Use

Using this application is quite simple. You can view it on a computer, laptop, or TV. The show is available as a DVD. So, it is convenient for daily use, and long-term storage is secure.

Bonus Materials

The program offers two no-cost bonuses. The first is the Top 20 Fall-Proofing Household Recommendations, and the second is the Downloadable Neuro-Balance Treatment. The Top 20 Recommendations offer a list of steps you may do to make your house safer and reduce the risk of falls. On the other hand, the

downloadable version allows you to access the program digitally from anywhere.

60-Day Money-Back Guarantee

A 60-day money-back guarantee backs the program. You get two months to test the program and discover if it benefits you. And then you can get a full refund if you are unsatisfied with its outcome.

Professional Guidance

The program was designed by Chris, an expert in Neuro-Balance Therapy. He explains how to perform specific movements correctly with the help of other experts and practitioners. This ensures that you are performing the exercises safely and effectively.

Affordable

Despite the program's many features and benefits, [it is affordable and available at a discounted price](#). For only \$47, you can get the complete program, all the bonuses, plus a Spike Ball. Furthermore, you can also choose the digital version without the Spike Ball for \$37.

Pros

- Improves balance and stability.

- Enhances brain and body function

- Increases foot and ankle strength
- Reduces the risk of falls and injuries
- Focused treatment plans
- Non-invasive and drug-free
- Easy to follow the program with instructional DVDs
- Includes a Spike Ball for increasing efficiency
- Provides neuroplasticity-based therapy
- It helps treat Multiple Sclerosis
- It helps restore peroneal nerve function
- 60-day money-back guarantee

Cons

- Requires regular practice and commitment
- Results may vary depending on your medical history
- Not suitable for people with recent medical complications

Benefits of This Program

Here are some potential benefits and best therapy outcomes of Neuro-Balance Therapy:

Improved Balance and Stability

Neuro-Balance Therapy aims to improve the revival speed of your peroneal nerve. This nerve can help you restore overall balance

and stability. For people who are elderly or have neurological disorders that impair their balance, this can be extremely helpful.

Reduced Risk of Falls and Injuries

Neuro-Balance Therapy can also help lower your chance of falling and suffering an injury by enhancing your stability and balance.

Falls can be a significant health risk, especially for older adults.

They can lead to serious injuries like fractures and head trauma.

Increased Confidence and Independence

When you feel more stable on your feet and have a lower risk of falling, you may also experience increased confidence and independence. You may be more likely to engage in enjoyable activities and feel more comfortable doing things independently.

Side Effects of Neuro-Balance Therapy

Neuro-Balance Therapy is generally safe and has no significant side effects. However, some people may feel slight discomfort or adverse effects during exercise. You should be aware of the following potential adverse effects:

Muscle Soreness

Like any workout program, some people may suffer muscle soreness or stiffness after engaging in the activities. This is a common and normal response to physical activity and should resolve within a few days.

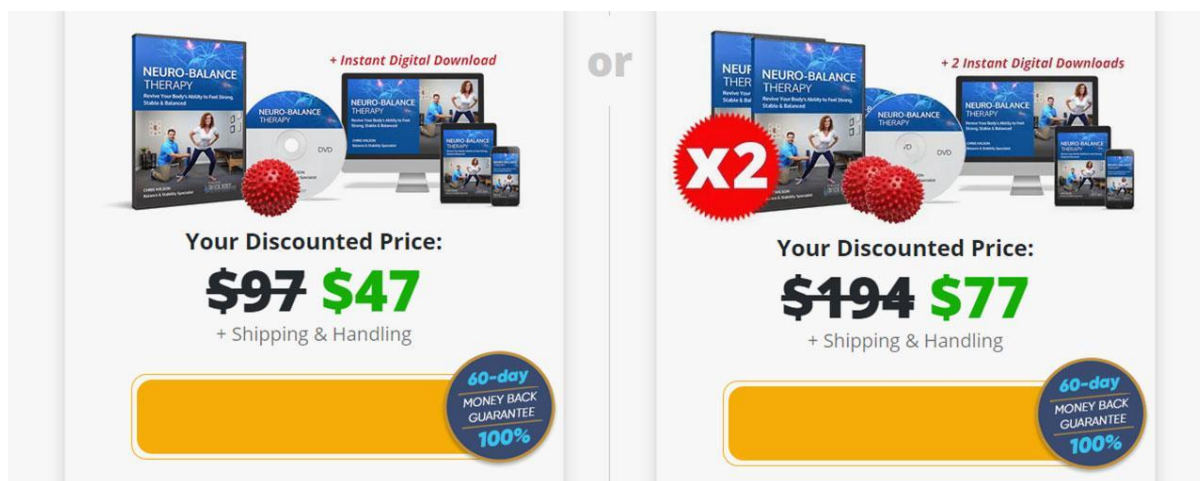

Foot Discomfort

Some people may experience mild foot discomfort or pain while using the Spike Ball to perform exercises. This may be due to the ball's pressure exerted on the foot. It can be alleviated by adjusting the pressure or taking breaks during the exercises.

Overall, the potential side effects and therapy outcomes of Neuro-Balance Therapy are minor. Although before beginning, it is a good idea to speak with your healthcare practitioner and review your medical history. [You can read additional Neuro-Balance Therapy reviews on the website.](#)

How Much Does It Cost?

Neuro-Balance Therapy offers two packages to its customers; both are available on the official website:

Complete Package

The Complete Package includes the physical therapy program with all bonuses and a Spike Ball. The package consists of a DVD as well as two bonuses. The Digital Version of Neuro-Balance Therapy and The Top 20 Recommendations To Fall-Proof Your House. This package was initially available at \$97. However, they are currently offering it at a discounted price of \$47 on the official website of Neuro-Balance Therapy.

Digital Package

The Digital Package includes the digital program without the Spike Ball. This package includes the same program as the Complete Package but in a digital format. It also includes the same two bonuses, The Downloaded Version of Neuro-Balance Therapy and The Top 20 Recommendations To Fall-Proof Your House. On the Neuro-Balance Therapy website, you can presently purchase this package for \$37.

Both packages come with a 60-day 100% money-back guarantee, which means that if the program does not work for you, you can claim a full refund within 60 days of purchasing it from the official website.

[Visit the official website for ordering Neuro-Balance Therapy program >>>](#)

Conclusion

The Neuro-Balance Therapy program is a reliable solution for those struggling with balance and stability. The program's success rate and therapy outcomes are evident by the thousands of people who have benefited from it.

Neuro-Balance Therapy can be your ultimate savior to avoid being clumsy and shaky. This therapy helps increase the rate of the revival of your peroneal nerve with its exercises. Accordingly, it will lead to reducing the risk of falls and injuries.

Visit their website to get instant access to the program and start your journey towards a safer and more balanced life. Remember, your health and safety are worth the investment. [Visit the official website to learn more about Neuro-Balance Therapy today!](#)
