What Is ProDentim?

As mentioned, ProDentim is one of the most talked about oral supplements that is available in the market now. The use of the formula is said to protect the microbiome population in the oral cavity which can be reduced by the use of different chemicals or other substances that we use to keep our mouth clean.

While oral cleanliness is important, what we should not forget is the fact that the mouth also has a huge population of bacteria that are beneficial to the body.

With the combination of some of the best ingredients along with 3.5 billion probiotics and nutrients, the ProDentim oral care formula helps restore and ensure the health of your mouth.

The different ingredients used in the making are known to be effective in their respective functions and these functions are not made claims backed by information from reputed scientific sources.

Along with this, the makers of the supplement take special care to avoid any chemical ingredient that can be harmful to the body or your oral cavity. ProDentim dental health aid comes in the form of soft tablets that you can chew, making the consumption easy and there are 30 tablets each in every standard bottle.

How Does The ProDentim Oral Health Supplement Work?

For years, we were taught that the issues associated with poor health were the result of bad bacteria, and in order to keep these bad bacteria away, we use different kinds of agents like toothpaste and mouthwash.

But recent studies have shown that the imbalance in the number of bacteria is due to the significantly reduced number of good bacteria in the mouth and the fact the use of different agents to keep the mouth clean has a part in this due to the different toxic ingredients present in it adds on top.

ProDentim oral health tablet is a well-sought combination of ingredients that are known to have an effect on the overall health and wellness of the oral microbiome.

Along with [taking care of the oral health](#) of the body, the ProDentim soft capsules also have a positive action on other organs and protect from other issues as well.

ProDentim Ingredients: What Goes Into The Making?

Having a proper understanding of the different ingredients used in the making is very important. This will help you to get an idea regarding the benefits of using the [ProDentim supplement](#) and also about the chances of having any kind of side effects from it.

The ProDentim ingredients are 100% natural in origin and there is also no trace of any kind of chemical or artificial ingredients in the making of the supplement. The list of ingredients are;

- **Lactobacillus Paracasei:** This bacteria is known for its effect on supporting the health of your gums and it also helps your sinuses to stay free and open too.
- **B.lactis BL-04:** The ingredient is used in the ProDentim supplement to support the balance of mouth bacteria and also to support a healthy immune system in the body. Along with these effects, it also helps to support the respiratory tract.
- **Lactobacillus Reuteri:** The major function of the ingredient in the body is to support a healthy mouth environment and it also helps with inflammation too.

Along with these ProDentim ingredients, a proprietary blend of 4 plants and minerals is also used in the making of ProDentim. The ingredients used in this mix are;

- **Inulin** - Supports the good bacteria found in the oral cavity
- **Malic acid (from strawberries)** - Helps to maintain the whiteness of the teeth
- **Tricalcium Phosphate** - Supports the health of the teeth
- **Peppermint** - Known for its natural anti-inflammatory property
