Unfortunately, that is not easy to find in the modern world, especially if you have no idea of producing your own food.

Thankfully, the [Self-Confidence Backyard](#) system contains all the tips, strategies, and illustrations of how to convert your home into a

self-sufficient homestead. The book is suitable for anyone who wants to become self-reliant and independent. Keep reading to know what the book includes and how it will transform your life.

What is the Self-Sufficient Backyard?

The Self-Sufficient Backyard is a book by Ron and Johanna. The couple has been living off the grid for the past 40 years and wants to teach you how to live self-sufficiently through the book Self-Sufficient Backyard. With the guide, you do not have to connect wires to your home or pay for food. It allows you to grow anything you want, create your medical garden, and have a water system that will last you all year round.

The Self-Sufficient Backyard is easy to follow and use, as it contains many step-by-step advice and time savers that will help you quickly achieve a self-sufficient life. You only need 1020 square feet of land per person to make this dream come true. But if you have less land or fewer family members, the guide also shows you how to downsize to get the best results.

What is Included in the Self-Sufficient Backyard?

The Self-Sufficient Backyard is divided into different chapters, and each section contains all the steps to help you easily implement what you want. Here is what you will learn when you get this guide:

How to Make a Cheap Water Collection System

You will learn how to create a water collection system for your homestead. The guide allows you to collect and store gallons of water in inexpensive tanks, ensuring you never have to pay for irrigation water.

The 7 Herbs You Need in Your Medicinal Garden

Having a medicinal garden in your homestead is a great idea. This guide will show you the 7 most essential plants that should be in your medicinal garden. Ron and Johanna say they have been using the plants for the last 40 years, and they feel great because they have never paid for natural remedies or supplements.

How to Produce Your Own Electricity

Electricity is costly, and you will do yourself a favour by learning how to create a cost-effective hybrid electricity system. The guide will show you what kind of batteries, controllers, inverters, cables, and everything you will need to produce electricity that will power all gadgets in your home.

The inexpensive hybrid system will help you save money in the long run, and you will never have to worry about outages or price increases. In fact, [you can even make money by selling the excess power to the utility company.](#)

24-hour BIO Insect Control System.

This automated system will help ensure there are no pesticides in your backyard. You will never have to purchase pesticides to spray on the foods you eat every day. The book allows you to make a simple bluebird and bat shelter. These birds will then help you eliminate the pests that threaten your crops.

According to Ron and Johanna, a bat can eat more than 4000 insects in one night, while a bluebird eats about 1000 bugs in one day. They will also help eradicate mosquitoes in your homestead.

How to Make Your Own Root Cellar

The Self-Sufficient Backyard also has a step-by-step guide on how to make your root cellar. Whether you want under the house cellar,

a full-sized cellar, a trash can, or a small barrel root cellar, you will find it in the book.

The Handy Beehive

You will also learn how to set up your beehives to give you delicious honey and pollinate your plants and trees.
