

Septifix Reviews - Should You Buy Septifix Septic Tank Treatment Tablets or Fake Results?

Septic tanks are a common and essential part of many households in the US, with approximately 21 million homes using them. Septic systems are responsible for treating household wastewater and sewage, making them crucial for maintaining a safe and healthy living environment. However, according to the Department of Health, approximately 31% of septic tank systems in the US are

failing to some degree, leading to groundwater contamination and posing a risk to public health.

Septic tanks are an essential part of many households in the US, treating household wastewater and sewage and ensuring a safe and healthy living environment. If you are a homeowner with a septic tank system, you may be familiar with the concerns surrounding the performance and maintenance of these systems. Luckily, there are solutions available to help prevent septic system failures and improve water quality. One such solution is [SEPTIFIX](#), a safe and effective septic tank treatment that uses aerobic bacteria to break down waste and neutralize harmful pathogens.

What Causes Septic Tank Failures?

Three types of bacteria are present in a septic tank system. The first type is aerobic bacteria, which helps break down waste efficiently. The second type is anaerobic bacteria, which are less efficient at breaking down solids and also carry disease-causing pathogens. The third type is faecal coliforms, which are indicators of faecal contamination and cause potential health risks.

Aerobic bacteria require oxygen to survive, which is why many septic tank systems have aerators. However, aerators can cost over \$10,000 for installation and require a yearly electricity cost of over

\$100. In contrast, anaerobic bacteria do not require oxygen to survive and are an indicator of disease-causing pathogens like typhoid, E. coli, salmonella, cholera, and even viruses like those that cause polio and Hepatitis A. These dangerous pathogens can contaminate groundwater and pose a severe health risk to households.

When septic tank systems fail, they can release harmful pathogens into the environment and contaminate groundwater. This poses a significant health risk to humans and animals that come into contact with the contaminated water. In fact, septic system failures have been identified as the number one groundwater contamination factor in the US.

To prevent you and your family from contaminated water and disease-causing pathogens, [SEPTIFIX offers a simple, organic and effective solution to septic tank failures.](#)

Introducing SEPTIFIX: The Revolutionary Septic Tank Solution

SEPTIFIX is a revolutionary septic tank solution that offers a safe, non-toxic, environmental-friendly, and 100% effective solution to septic tank failures. Manufactured in a modern facility in the US,

SEPTIFIX is made of 14 strains of aerobic bacteria, over 10 billion bacteria strains per gram, and oxygenation and pH-regulating compounds that help boost the growth of bacteria colonies inside your septic tank, allowing them to thrive for up to 90 days.

SEPTIFIX has been shown to improve the quality of water released to the environment, compared to other solutions. Using SEPTIFIX on a monthly basis has been shown to achieve better results than those achieved in most advanced municipal treatment systems.

How SEPTIFIX works on septic tank failures

When SEPTIFIX's 55-gram tablets are added to your septic tank, they dissolve slowly, releasing sodium carbonate and oxygen – up to 10 litres of oxygen per tablet. The oxygen, in the form of small bubbles, disperses throughout the septic tank, while sodium carbonate acts as a buffer on the water, bringing it to a neutral pH.

The released oxygen reacts immediately with the waste substances that are inside the septic tank and reduces, then slowly eliminates the smell – in just 3 to 5 days. At the same time, harmful anaerobic bacteria like E. coli and Salmonella are destroyed. Additionally, the tabs also feed on all organic residue in the septic tank including

grease, oils, toilet paper, and soap. This allows you to save on having your septic tank pumped every month, which could save you thousands of dollars in the long run.

Why SEPTIFIX is the Top Choice for Septic Tank Solutions

When it comes to septic tank treatments, SEPTIFIX stands out from other solutions with its unique set of benefits, including:

Enhanced Oxygen Levels: Unlike other treatments, SEPTIFIX's tablets provide a significant boost in oxygen levels that can't be achieved through manual aeration. With 75% higher oxygen concentrations, the live bacteria in the septic tank thrive for up to 90 days.

Rapid Odor Removal: SEPTIFIX reacts immediately, releasing up to 10 litres of oxygen per tablet that eliminates Hydrogen Sulfides, the source of unpleasant septic smells. In just a few days, your septic tank will be odour-free.

Balanced pH Levels: SEPTIFIX's additional ingredients help to neutralize the pH of wastewater, which when combined with the

higher oxygen levels, encourages the growth of aerobic bacteria that break down waste more efficiently.

Eco-Friendly: SEPTIFIX is made using natural, non-toxic ingredients, making it an environmentally friendly option. It is free from harsh chemicals or pollutants that can harm the environment, making it safe for both households and the environment.

Cost-Effective: Compared to traditional aeration systems that can cost upwards of \$10,000 to install, SEPTIFIX is a cost-effective option. A single tablet can treat a 1,000-gallon tank for up to 90 days, making it a more affordable solution.

User-Friendly: SEPTIFIX's simple-to-use tablets can be easily dropped into the toilet or directly flushed into the septic tank, without the need for specialized equipment or professional installation.

Customer reviews on SEPTIFIX

SEPTIFIX solutions have been used by [thousands of septic tank owners](#) in the U.S., who have witnessed the power of using it over natural aeration or other competitors. The power arises from the deep research and studies the manufacturer used to develop the

septic tank solution, with an additional \$1.5 million invested in its R&D. Below are some of the happy customers who have used SEPTIFIX:

“Septifix is really amazing! I can't believe I don't need to call the expensive pumpers anymore! Septifix is so easy to use! I just put one tab in my toilet on the first of every month, and that's all the treatment my septic tank needs!” – Michael P., Brevard, FL

“I have been using Septifix every month since January 2019! I can't believe how efficient these small tabs are, as before Septifix, I used to have my septic system pumped out every 12 to 14 months. The last time my septic system was pumped out was Sept 2018, but I still have no need for it to be emptied.” – Jason L., Quincy, MA

How To Buy and Use SEPTIFIX

Unfortunately, [SEPTIFIX is only available online on the official website](#). The septic tank treatment is affordable, compared to traditional solutions, and the manufacturer is offering huge bonuses currently.

Here are the packages that you can buy on the SEPTIFIX website and save \$1000s of dollars for a better septic tank treatment:

Sample Package: 6-month supply of SEPTIFIX retails at \$69 per pack + shipping costs. This saves you 30%.

Popular Package: 12-month supply of SEPTIFIX retails at \$59 per pack (or \$118 in total) + free shipping and handling costs. This saves you 40%.

Best Value Package: 18-month supply of SEPTIFIX retails at \$49 per pack (or \$147 in total) + free shipping and handling costs. This saves you 50%.

In case you are not satisfied with the product, for any reason, the manufacturer offers a 60-day money-back guarantee on all packages. Simply contact the support team through support@septifix.com and you will receive your money back on your credit card.
