

Urinoc Reviews: Should You Buy? Ingredients, Side Effects Exposed!

Urinoc is a prostate health supplement [available exclusively online](#).

By taking two capsules of Urinoc daily, men can purportedly fix their prostate, boost testosterone, increase sperm production, strengthen muscles, and even regrow hair, among other benefits.

Does Urinoc live up to the hype? How does Urinoc work? Please keep reading to find out everything you need about the prostate health supplement and how it works today in our review.

What is Urinoc?

Urinoc is a nutritional supplement featuring natural ingredients that support prostate health.

Developed by a surgeon named Dr. Wesley, Urinoc claims to shrink your prostate, raise testosterone, increase sperm production, boost fertility, enhance lean muscle mass, and reverse balding, among other benefits.

Dr. Wesley and his team market Urinoct to men with benign prostatic hyperplasia, or BPH. 50% of men over 50 have an enlarged prostate or BPH. An enlarged prostate leads to symptoms like difficult urination, frequent nighttime trips to the bathroom, and sexual dysfunction.

Urinoct is [exclusively available online through the official website](#), priced at around \$69 per bottle.

Urinoct Benefits

Urinoct can purportedly support the following benefits, according to the official website:

- Reduce symptoms of BPH and restore your prostate to average size
- Boost testosterone levels
- Increase sperm production
- Strengthen muscles
- Help hair follicles grow
- Avoid the side effects of prescription prostate medication

To achieve these effects, Urinoct flushes heavy metals out of your body, allowing you to resume living a healthy, everyday life.

How Does Urinoct Work?

The makers of Urinoct market the supplement as an alternative to prostate medication.

According to Dr. Wesley and his team, men who take prostate medication prescribed by their doctor are “*poisoning*” themselves without realizing it. Here's how Dr. Wesley explains the issue:

“We’re poisoning ourselves without even realizing it! The worst part is, they’ve known it for ages! These elites are just monetizing your pain, stuffing you with their expensive, useless meds that not only keep you addicted, they can even cause your death!”

Prostate medication treats the symptoms of an enlarged prostate. It doesn't treat the root cause of the issue.

Instead, Dr. Wesley recommends taking his formula: Urinoct. Urinoct features a blend of natural ingredients to cleanse heavy metals from your body, freeing you of prostate problems.

How Heavy Metals Cause BPH

Dr. Wesley and his team formulated Urinoc on the assumption heavy metals cause prostate problems.

You're exposed to heavy metals every day. Over time, these heavy metals accumulate in your body. They're in the water you drink and the foods you eat.

Heavy metals accumulate in specific body parts, leading to health problems. Some heavy metals accumulate in the soft tissue around your prostate, for example, leading to issues with your prostate.

Here's how Dr. Wesley explains the connection between heavy metals and your prostate:

“...at some point, these heavy metals cannot move any further and get lodged inside the prostate’s thick tissue. They, they inflame it, causing it to swell and putting pressure on your bladder.”

It's like blood vessels pushing minuscule amounts of gravel to your prostate daily. As heavy metals travel further through your bloodstream, they cause more and more noticeable problems with your prostate.

Have you ever wondered why prostate problems get worse with age? According to Dr. Wesley, it's because of toxic metal accumulation in your body. These heavy metals accumulate in and around your prostate over time, leading to BPH.

Urinoc Ingredients

Urinoc contains a blend of natural ingredients handpicked by Dr. Wesley to support the average prostate size. After 15 years of study and years of education, and experience as a surgeon, Dr. Wesley used his wealth of medical expertise to choose the best ingredients in Urinoc.

The official website says Urinoc includes the active ingredients below:

Vitamin A

Urinoc contains vitamin A, a popular vitamin crucial for multiple functions throughout the male body. Some men take vitamin A supplements for eye health. However, Dr. Wesley recommends taking vitamin A to rejuvenate the prostate, bladder urethra, testicles, and penis.

Vitamin C

Vitamin C is a powerful antioxidant found in fruits and vegetables. It's known to support healthy inflammation throughout the body. According to Dr. Wesley, vitamin C will help flush out heavy metals and “eliminate inflammation” while restoring your

prostate to its full strength. Vitamin C even finds and eliminates heavy metals “lodged” within your prostate, then repairs the damage those heavy metals have done to the region.

Fish Oil

Urinocet contains fish oil, a popular health supplement ingredient linked to heart, energy, nerve, and brain health. Fish oil traces its effects to two omega-3 fatty acids: docosahexaenoic acid (DHA) and eicosapentaenoic acid (EPA). These compounds cleanse heavy metals from the body while eliminating the root cause of pain and inflammation.

What Does Urinocet Do?

The natural ingredients in Urinocet work in different ways to support your body's inherent detoxification processes. By taking Urinocet daily, you can [help your body cleanse heavy metals](#) from the soft tissues around your prostate, restoring prostate health.

Here are some of the things you can expect after taking two capsules of Urinocet daily:

Step 1) Flushes Out the Heavy Metals Lodged in the Prostate

After your body absorbs the nutrients in Urinocet, it begins to flush out the heavy metals that cause benign prostatic hyperplasia (BPH). These heavy metals disrupt your immunity and impede your health. They're silently sapping your energy and affecting your wellness every day. Urinocet doesn't just claim to eliminate heavy metals: it also claims to flush away microplastics from your body.

Step 2) Eliminates Inflammation Surrounding the Prostate

As the area around your prostate becomes inflamed, you may notice increased symptoms of BPH. After Urinocet flushes out heavy metals and microplastics from around your prostate, you may see reduced inflammation. As inflammation drops, you could experience fewer symptoms of BPH than you previously did. This inflammation isn't putting pressure on your bladder or prostate like it used to.

Step 3) Help Your Immune System Fight Prostate Problems on Its Own

Too much inflammation makes it hard for your immune system to do its job. Urinocet can support your immune system by reducing inflammation and helping you fight against anything affecting your prostate. When your immune system can do its job more effectively, your body can fight off things affecting your prostate, sexual health, and overall health.

Step 4) Shrinks Prostate Size and Rejuvenates Reproductive System

For the final step, “*your prostate returns to its healthy size,*” according to Dr. Wesley and his team. Urinoc had shrunk your prostate to its standard size, allowing you to feel like you did when you were younger. You can avoid urinary problems, boost testosterone, lose weight, gain muscle, and recapture the vitality of your youth, according to Dr. Wesley and his team, just by taking two capsules of Urinoc per day.

What to Expect After Taking Urinoc

According to the official Urinoc website, the prostate supplement can cause significant and noticeable benefits within the first few weeks – or even the first few days – of use.

One of Dr. Wesley's patients approached him, complaining of severe prostate problems. Dr. Wesley told the patient to take Urinoc. Here's what happened next:

Within days of taking Urinoc for the first time, the patient was peeing with less effort and pain. Despite having a severe case of benign prostatic hyperplasia (BPH), the patient experienced rapid relief soon after taking Urinoc.

A few days later, the patient realized Urinoc had helped him through the night without needing to pee. He slept all night long without a single trip to the bathroom.

The patient was also waking up with a morning erection – something that hadn't happened for a long time. That morning's erection lasted two hours.

After 45 days on Urinoc, the patient underwent tests to confirm the results. Dr. Wesley's tests revealed his prostate was “*rejecting heavy metals.*”

Tests also revealed Urinoc had increased the patient's testosterone levels by 221%. The patient also claimed he had lost significant weight and reduced his belly fat, describing it as a feeling of liberation.

Overall, Dr. Wesley's first Urinoc patient experienced significant results within just 4 to 6 weeks of taking the supplement for the first time.

Scientific Evidence for Urinoc

Most prostate health supplement companies don't invest in clinical trials because they're expensive and time-consuming. However, Dr. Wesley and his team conducted a clinical trial after experiencing impressive results with early patients.

Here's how the first Urinoc clinical trial worked:

- Dr. Wesley and his team gathered a group of 67 volunteers. He told the volunteers to take Urinoc over 30 days.

- Before the 30 days were over, Dr. Wesley had received numerous reports of men fixing their prostate problems and sexual health issues with Urinoct.
- To confirm the results, Dr. Wesley asked the men to take tests. Those tests confirmed that 100% of men “got rid of BPH” after taking Urinoct.

In addition, 100% of volunteers involved in the Urinoct clinical trial experienced higher libido, better erections, increased lean muscle mass, better sex drive, improved energy and stamina, and better weight loss, among other benefits. In other words, Urinoct solved virtually every health and wellness problem faced by men within fewer than 30 days of taking the supplement for the first time.

Motivated by the results of his first clinical trial, Dr. Wesley repeated the test on a group of “4,4000 initial brave volunteers from 12 different countries,” which would make Urinoct’s trial the largest prostate health supplement trial in industry history. That trial verified that Urinoct worked as advertised to fix prostate problems in men quickly.

Some studies have indicated a connection between fish oil supplementation and prostate health. In a 2013 study, for example, researchers found good omega-3 fatty acid intake was associated with a reduced risk of prostate cancer. However, researchers have also found taking too much fish oil is linked to a higher risk of prostate cancer.

Some men take vitamin C supplements for BPH. Vitamin C inhibits a specific type of testosterone expression to prevent BPH effectively. In a 2010 study, researchers found taking a vitamin C supplement prevented testosterone-induced BPH in rats by down-regulating HIF-1-alpha.

Overall, the makers of Urinoct provide limited information about what's inside Urinoct and how the supplement works. However, studies show some of the ingredients in Urinoct could support prostate health in various ways.

Urinoct Reviews: What Do Customers Say?

Urinoct appears popular among men with prostate problems, many of whom have experienced significant benefits soon after taking Urinoct for the first time.

Here are some of the reviews from former BPH sufferers who have taken Urinoct and experienced results:

One man claims he can “*pee like a horse*” after taking Urinoct, describing the results as “*incredible*.”

Other men like taking Urinoct because they can resume living without care. Instead of worrying about where the nearest bathroom is at all times, they can go about life stress-free.

One reviewer was forced to retire from football because of his extreme bladder pain. One year ago, he started taking Urinoct, and the supplement rapidly eliminated his pain and his endless urge to pee. Today, he feels like Urinoct has restored his youth and now feels like he did in the prime of his life.

A 67-year-old reviewer claims he suffered from BPH for “over 15 years” before taking Urinoct. He tried medication and surgery, but nothing worked until he started to take Urinoct. Now, he no longer wakes up to pee in the middle of the night. He describes Urinoct as “a real game changer.”

One 48-year-old reviewer claims he had intense pain in his bladder and rectum for five years. After 30 days of taking Urinoct, he has no more pain and no longer struggles to urinate, claiming “everything is amazing.”

A 53-year-old reviewer claims he used to take many strong pills to treat his prostate problems, but the side effects made his life miserable. After taking Urinoct, however, the pain and burning sensation disappeared to a point like it was “never there in the first place.”

According to Dr. Wesley, his phone rings “every day” with testimonials from patients who have experienced rapid relief from prostate problems after taking Urinoct. Dr. Wesley also claims “thousands” of men with BPH have used his supplement to fix their problem. Overall, most reviewers agree Urinoct works as advertised to help even the most severe cases of BPH.

Each bottle of Urinocet contains a 30-day supply, or 30 servings (60 capsules). Dr. Wesley recommends taking two pills per day to shrink your prostate. He also recommends the six-bottle package, as it's the “doctor recommended” serving to take.

Dr. Wesley claims he could sell each bottle of Urinocet for \$347. However, he claims “this isn't about the money” for him. Instead, he's selling Urinocet at a discounted price out of the goodness of his heart.

Urinocet Refund Policy

Urinocet comes with a 60-day, 100% money-back return policy.

You can request a complete refund on your purchase within 60 days without questions. If you're unhappy with Urinocet for any reason, contact the manufacturer and return the bottles to:

- Return Address: 19655 E 35th Drive, Suite 100, Aurora, CO 80011

About Urinocet

Urinocet was developed by a surgeon named Dr. Wesley, who partnered with Jason Collins to release the supplement to men with prostate problems.

Jason Collins suffered from a severe case of BPH, and he turned to Dr. Wesley for support. At one point, doctors considered amputating his penis and testicles due to the severity of the condition. After hearing Jason's story, Dr. Wesley developed a formula to treat his prostate problems. Today, [anyone can buy that formula in the form of Urinocet.](#)

You can contact Dr. Wesley and the Urinocet customer service team via the following:

- Registered Address: 19655 E 35th Drive, Suite 100, Aurora, CO 80011
- Email: support@urinocet.com

Dr. Wesley and his team make Urinocet in an FDA-registered, GMP-certified facility in the United States.

Final Word on Urinoct

Urinoct is a prostate health supplement that, according to the official website, will “ensure your prostate will return to its healthy size safely and permanently.”

Two capsules daily can allow the natural ingredients in Urinoct to restore your prostate to its standard size. The formula cleans heavy metals from your bloodstream, helping you restore average prostate size.
