Too much hype or not?

"I have received many messages in the past mentioning this video series. As such, I was very skeptical. After getting access to the member's area – instantly to my surprise – I watched the first two videos. To say that my skepticism was wrong is a bit too easy on me. The projects managed to surpass the hype that it has had, much to my surprise and happiness. I would recommend it to anyone looking to build things for his home or loved ones."
